

## Keystone First Adds Influenza Vaccination Care Gap

Childhood vaccinations protect children from many serious and potentially fatal diseases.<sup>1</sup> The HEDIS® Childhood Immunization Status (CIS) measure includes 10 different vaccinations, including the influenza vaccine. To help ensure your patients are receiving this recommended vaccination and completing the vaccination series, we have added a new Care Gap for the influenza vaccination. See below for status information that will display for this Care Gap.

You can find detailed information about the Care Gap in the specifications document posted on our website at [www.keystonefirstpa.com](http://www.keystonefirstpa.com)→Provider→Resources→NavinNet→Navinet Features & Tools→ Care Gaps

Influenza Vaccination Care Gap Status Definitions:

- Missing: No influenza vaccination.
- Up-To-Date: At least two influenza vaccinations with different dates of service between six months and two years of age.
- Series Incomplete: One influenza vaccination between six months and two years of age.

This Care Gap Alert will appear on your screen in NaviNet for members who are two years of age. Care Gaps can also be viewed in NaviNet when checking a member's eligibility and benefits and through the Reports Inquiry or Member Clinical Summary option. If you need assistance accessing and resolving Care Gaps, please check out the [Resolve Care Gaps Help Page](#) on NaviNet or the training video on your Plan Central page.

If you have questions about this communication, please contact your provider account executive or the Provider Services department at 1-800-521-6007.
